

Working Student – Business Development

Location: Pirmasens or Berlin area (hybrid)

Contract: Working student, up to 20 h/week

Salary: Competitive

Who are we?

Computational Modelling Pirmasens GmbH (CMPG) is a subsidiary of Computational Modelling Cambridge Ltd. (CMCL), an award-winning, research-driven software company. With our technology “The World Avatar” we build digital twins that connect data and systems across domains and scales and automate workflows. Current projects: urban digital twins for municipalities (city planning, energy infrastructure, flood scenarios), a work-order app for municipal service providers, AI-based extraction of information from hospital documents, and the digitalisation of research laboratories. We also work closely with large research institutions such as the University of Cambridge and TU Berlin. Our team is small, international and growing.

The role

You support management and the business development team in bringing our solutions to municipalities, hospitals and research institutions – from research to presentation. You get your own topics and see directly what comes of your work.

What you will do

- Research target markets, potential customers, tenders and funding programmes
- Maintain contact lists and the CRM, prepare customer outreach
- Create presentations, proposals, website and LinkedIn content
- Prepare and support trade fairs and events
- Contribute to grant applications and tender documents

What you bring

- Enrolled in business administration, industrial engineering, business informatics, entrepreneurship or a similar programme
- Initiative and a structured way of working: you get into new topics on your own
- Clear written and spoken communication; confident with PowerPoint and Excel
- Interest in software, AI and the digitalisation of the public sector
- Fluent German, good English

What we offer

- Real projects instead of busywork – your work ends up with customers
- Flexible hours around your studies (fewer hours during exam periods are fine)
- Option to write your thesis with us and to join full-time after graduation
- Competitive pay

How to apply

Send your **CV** and a **short cover letter** (relevant experience, why this role) by email to careers@cmpg.io. You must hold a valid work permit for Germany.
